

## CENSUS PUBLICATIONS

### 3. SUBJECT GUIDE

OCTOBER - DECEMBER, 1945

Vol. 1.

Washington 25, D. C.

Pt. 3, Nos. 10-12 (combined)

Census Publications consists of the following parts issued separately:

1. Catalogue—In 1945 this covers 16th Census publications. After this year this part will cover current publications, incorporating into this series the present catalogue Census Bureau Publications.
2. List of Publications Issued (monthly)—a listing of special publications, reports issued in series at irregular intervals, and regular publications issued less frequently than quarterly.
3. Subject Guide (quarterly)—a classified guide to contents of all publications issued during the month.

Census publications are furnished free upon request except for certain reports, for which a price is given.

#### INTRODUCTION

The first volume of Part 3, Subject Guide, of the Series "Census Publications," is completed with this issue. This index to the statistics in all Census publications issued during the year, has undergone various changes since it was introduced on an experimental basis with the November 1944 issue. The first five issues, November and December 1944—Experimental, and Volume I, Numbers 1 to 3, were issued on a monthly basis. A quarterly, covering April-June 1945 (Nos. 4-6, Combined), was then issued as an experiment to determine which frequency was more practical, and also as a means of putting the series on a more current basis. It was found that issuing the index on a quarterly basis permitted more careful preparation and gave users an opportunity to observe changes in and similarities of reports issued in series. For these reasons, the frequency of issue of the Subject Guide was changed from monthly to quarterly, effective with the index for July-September 1945 (Nos. 7-9, Combined).

Volume II of this Guide, covering 1946 publications, will have the less cumbersome series numbering Vol. II, Pt. 3, No. 1 to No. 4.

Criticisms by users of the Subject Guide, and suggestions of appropriate cross references and groupings, will be appreciated. All comment should be addressed to the Director of the Census, Washington 25, D. C.

A change in plans for Part 1 of "Census Publications" was made in November 1945. Previous to that time, Part 1 had been designated as Program for the Year. (See box below the heading of each issue of this series to that time.) Volume I, Part 1, now consists of a listing of the publications based on the 16th Census of the United States, 1940, Catalog of 16th Decennial Census Publications, December 31, 1945, in process of being printed. Volume II, Part 1, will be a catalog of current Census publications, both regular monthly and quarterly releases. No publication titled Program for the Year will be issued.

#### CHANGES IN CURRENT PUBLICATIONS

At the present time, many of the regular publications of the Bureau are going through a period of change. It is the aim of the Subject Guide to keep users of Census material informed of these changes and to facilitate the cataloguing of Bureau publications by librarians. Changes in coverage and frequency, and additions of data on new items will be noted in the analysis in the main entry for a specified publication; and additional cross references will be added as needed.

Since the dissolution of the War Production Board as a result of the end of the war, some of the Facts for Industry releases for which that agency and the Bureau of the Census had been jointly responsible, have been discontinued. Following is a list of discontinued releases, together with the series numbering of the final release and the period covered by the data:

## Census Publications

The Civilian Production Administration has assumed responsibility for certain surveys in industry formerly conducted by WPB. The releases of data on these subjects will continue under the joint supervision of the Bureau of the Census. In like manner, the Bureau has assumed full responsibility for collecting data and publishing releases in other fields heretofore handled jointly by WPB and Census.

### FOREIGN TRADE STATISTICS

Attention of users of foreign trade statistics is called to an article in Foreign Commerce Weekly (November 24, 1945) by J. Edward Ely, Chief of the Foreign Trade Division of the Bureau. This article, titled "New Foreign-Trade Transport Statistics," is based on an address by Mr. Ely at the Thirty-Fourth Annual Meeting and Convention of the American Association of Port Authorities, Chicago, October 11, 1945. Included is a discussion of statistics which can now be made public since the end of the war, such as method of transportation used (air, vessel, rail, truck); routing of air and vessel shipments; types of commodities having different shipping problems; and the extent to which United States ports and individual shipping routes are sharing in the increased and changing traffic. Tables show the most common type of statistics formerly supplied,

compared to the types which now can be made available. Future estimates of United States foreign trade are discussed, together with qualifying factors to be taken into consideration when using these estimates.

Although there has been no over-all revision of the classifications used in foreign trade statistics, certain schedules and changes in the schedules used in reporting and compiling data on the foreign trade of the United States have been issued, effective January 1, 1946. A revision of Group 8, Chemicals and Related Products, Parts I and II, of Schedule B, "Statistical Classification of Domestic and Foreign Commodities Exported from the United States," has been issued. With the exception of a few additional minor changes in other commodity groups, which changes have been published in bulletin form, the January 1, 1945 edition of Schedule B remains in effect. (See *Foreign Trade: Exports* in the index.) Also certain changes in Schedule A, "Statistical Classification of Imports into the United States," January 1, 1943 edition, are now available in bulletin form. (See *Foreign Trade: Imports* in the index.) Schedule D, "Code Classification of Customs Districts; Indicating the Ports of Lading and Unlading in the Foreign Trade of the United States," has also been issued.

## RETAIL TRADE: SALES

Retail Sales, Independent Stores. Individual reports for 34 States. Monthly.

A separate report for each State includes a summary of the data, one chart and two tables (except where an additional table is included for certain individual cities). The tables and chart are identical, in blank, for all States. Both tables indicate number of firms reporting, percentage change in sales, current month vs. same month preceding year, current month vs. preceding month, year-to-date vs. corresponding period preceding year, and dollar volume of sales current month. One table shows the information by city-size groups, with sales of selected cities shown separately. The other table presents the data by kinds of business. The chart compares the percent of sales of the same kinds of business listed in the table for current month and same month, preceding year. Data are based on a sample survey of stores selected to indicate sales trends for the State, and sales are shown as reported without adjustment for seasonal or price fluctuations.

Release dates are shown for each State report. Each report contains 2 pages, with a few exceptions for which the number of pages is indicated in parenthesis. The releases for each month cover the data for the preceding month, except in cases where two releases appear for the same State in one month covering data for each of the two prior months.
